

1. Basic java program

Objective: Understanding a simple java program

Description and Code:

Create a java file and save it as A.java file and then put following code into this file: -

```
package src;  
  
public class A  
{  
  
    public void Method1(String str1)  
    {  
        System.out.println(str1);  
    }  
  
}
```

Create a file and save it as Program1.java and then put following code into this file: -

```
/* import 'A' class from src package*/  
import src.A;  
  
public class Program1  
{
```

```
public static void main(String args[])
{
    // Declare and Initialize the String variable with a value

    String str = "Manipal University, Jaipur";

    // Creating an instance of class A

    A obj = new A(); // object creation

    obj.Method1(str);
}
}
```

Expected Output:

Manipal University, Jaipur
